

Green Mining

Environmental Protection Plan

Use the boxes below to create your environmental protection plan. You must consider these facets during construction and operation of the mine. Use bullet points to record your ideas.

**Species Protection: How will you protect species near your mine site?**

**Water Quality: How will you protect water from contamination at your mine?**

**Energy and Sustainability: What green technology can you implement at your mine to help the environment?**

**Reclamation/Restoration: How will you return the environment to its original state after mining?**

**Indigenous Ways of Knowing: How can Indigenous knowledge inform your environmental protection plan?**
