

Handout

Computational Thinking Mind-Map

In pairs, create a mind-map reviewing the concept of computational thinking.

Computational Thinking

Climate Change Terminology

Use a variety of resources, such as textbooks and the internet, to research, define the following terms, and relate the terms to climate change.

Albedo:

Anthropogenic:

Atmosphere:

Carbon Cycles:

Heat Sinks:

Hydrosphere:

Scratch Brainstorming

Your task is to create an efficient code (the shortest code possible) in the *Climate Change Carbon Cycle Terminology Example* Scratch program that will continue the current pattern with the remaining Climate Change terminology.
