

Wire Wrapping Tutorial

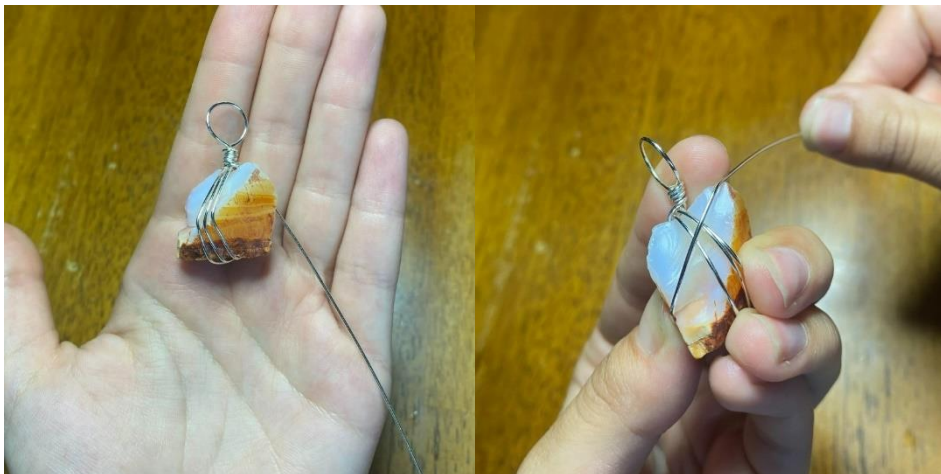

Step 1: With your round nose or wire looping pliers make a loop in the middle of your wire and twist ends together.

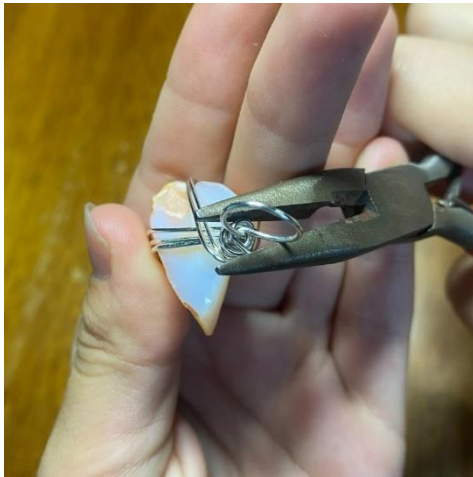

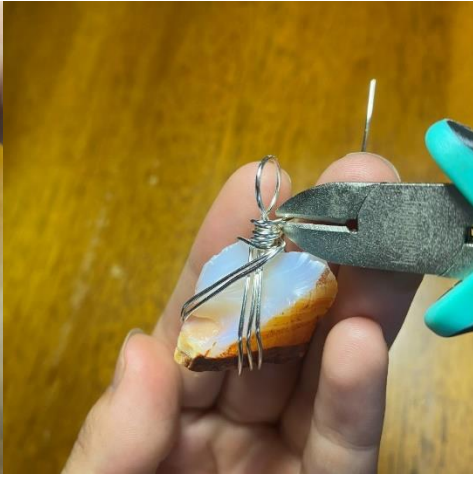

Step 2: Place the loop in the middle of your rock and tightly wrap one of the ends around your rock leaving some wire loose.

Step 3: With the loose end of the wire wrap around the base of the loop where the twist is. Cut off excess wire with jewelry wire side cutters. Tuck in pointy edge with your chain nose or flat nose pliers to ensure nothing pokes you.

Step 4: With the second side of the wire repeat step 2

Step 5: Repeat step 3

Final product! This wire wrapped pendant can be added to a necklace, a key chain, or anything else!
